00:06 19:00 00:11 September 9,
2010, 20:40. 00:13 Today we have
our first release of Deep Freeze
7.00.060.3172 and the fixes that
we shipped out to our Beta testers.
00:18 This has been a long time
coming. 00:20 You have probably
been seeing the announcement that
we have been promising for quite a
while. 00:25 We want to get that to
everyone as soon as possible. 00:30
You probably would have to wait
for our next Beta Test to get it.
00:34 We are going to give you a
temporary workaround to enable

you to get to that later. 00:39 This is the beta testing phase of 7.00.060.3172. 00:41 If you want to be one of our Beta testers, then just email the word beta to our support group and we will get you set up. 00:45 You should have received something in the last week or so. 00:48 We should now be able to ship out 7.00.060.3172 to everyone. 00:54 I have a list here. 00:56 This is the list of the fixes that we have to solve for 7.00.060.3172. 01:03 I will go through the most severe ones and I

will give you a little more detail.

01:07 The first one is that we do not support Vista and we do not support Windows Server 2008.

01:12 We will be fixing this in the next release for 7.00.060.3173.

01:17 The next one is that we do not support Windows 7. 01:20 We will be fixing this in the next release for 7.00.

Deep Freeze Standard
7.00.060.3172 licence key for the
best Deep Freeze Standard
7.00.060.3172 licence key. You
